POLYMER MECHANICS
Volume 9, Numbers 1-6, 1973

(A translation of Mekhanika Polimerov)

Volume 9, Number 1 January-February, 1973

	Eng./	Russ.
Estimation of the Loaded Chain Fraction in Oriented Polymers – K. E. Perepelkin and V. N. Romanov	1	3
Effect of Technological Factors on the Structure and Properties of Eskaplen Film Material – É. M. Glukhova, O. N. Belyatskaya, I. L. Bykov, and V. E. Gul'	5	8
On the Theory of Orientation of Linear Amorphous Polymers. 2. Orientation Regimes – G. M. Bartenev, A. A. Valishin, B. V. Perov, and E. S. Osikina	10	14
Kinetic Nature of Polymer Microhardness – M. S. Kats, V. R. Regel', T. P. Sanfirova, and A. I. Slutsker	16	22
Deformation and Strength Properties of Carbon-Reinforced Plastics in Compression – Ya. V. Auzukalns, F. Ya. Bulavs, and G. M. Gunyaev	22	29
Physical Nonlinearity with Microstructural Transitions – G. Brankov and N. Petrov	29	36
Poisson's Ratio of Foamed Plastics – A. G. Dement'ev, P. I. Seliverstov, and O. G. Tarakanov	37	45
Allowance for the Effect of Hydrostatic Pressure in Calculating the Deformation of Polymer Structural Elements – V. V. Moskvitin, E. A. Baslavskaya, and L. I. Verbitskaya	41	50
An Approximate Method of Solving Dynamical Problems of Thermoviscoelasticity – A. D. Kovalenko and V. G. Karnaukhov	48	58
Determination of the Stresses in Polymeric Coatings with Allowance for "Frozen" Strains – M. N. Bokin, E. V. Meshkov, V. V. Poltavtsev, Yu. S. Utkov, and V. N. Shalygin	55	66
Investigation of the Relaxation Process in Polycarbonate Film – Yu. I. Trubnyakov, V. B. Bakhmendo, and V. D. Khomichev	60	72
Solution of the Integral Equations of Hereditary Theory – M. A. Koltunov, I. E. Troyanovskii, and A. M. Shengelaya	64	77
The Origin of Embryonic Laser Cracks – O. E. Marin, N. F. Pilipetskii, and V. A. Upadyshev	68	82
Initial Stresses in Reinforced and Filled Polymers – V. P. Stavrov and A. P. Velichko	76	90
Effect of a Filler on the Strength Properties of Thermosets – V. I. Davydenko, V. I. Volkomorov, and V. I. Murovich	82	97
Microtribometric Investigation of Polymer-Based Self-Lubricating Composites – A. I. Sviridenok, V. M. Ken'ko, and V. A. Belyi	87	102
Strain Continuity Equations in Timoshenko-Type Shell Theory – R. B. Rikards	90	105
States of Stress in Multilayer Spherical Vessels, Cylindrical Tubes, and Circular Disks of Linear Viscoelastic Material – Yu. V. Nemirovskii and M. L. Kheinloo	94	110
Solution of the Problem of the Plane Deformation of a Tube Made of Physically Nonlinear Quadratic Viscoelastic Material – V. V. Kolokol'chikov	100	117
Relation between the Shear and Longitudinal Viscosity Coefficients for Concentrated Polymer Solutions – V. N. Pokrovskii, N. P. Kruchinin, G. A. Danilin, and A. T. Serkov	106	124
Viscoelastic Properties and Unstable Flow of Monodisperse Polybutadiene Solutions – N. K. Blinova, S. I. Sergeenkov, A. Ya. Malkin, Yu. G. Yanovskii, and G. V. Vinogradov	113	132

Engl./Russ.

Investigation of the Relations between the Various Mechanical Properties and the Biochemical Composition of Human Bone Tissue – Yu. Zh. Saulgozis, L. I. Slutskii, I. V. Knets, and Kh. A. Yanson 119 138

BRIEF COMMUNICATIONS

Effect of Gamma Radiation on the Mechanical Properties of Polyvinylidene Fluoride – B. P. Kosmynin and E. L. Gal'perin 126 146

Effect of Long-Term Storage of Polycarbonates on Stress Relaxation – P. M. Ogibalov and V. I. Moroz 130 149

Relaxation Spectra in Polymers – G. M. Bartenev, L. A. Shelkovnikova, and L. A. Akopyan. 133 151

Intensity of the Relaxation Processes in Statically Loaded, Highly Oriented Synthetic Fibers – A. M. Stalevich 137 154

Investigation of the Mechanical Properties of Acrylics under Conditions of Creep, Stress Relaxation, and Harmonic Vibration – V. N. Fedorova, A. P. Molotkov, and Yu. V. Zelenev 141 157

Probability Characteristics of the Shear Modulus of Glass-Reinforced Plastics – V. I. Ignatov and N. A. Rabotnov 144 160

Determination of the Mechanical Characteristics of a Glass-Reinforced Plastic During Winding – A. L. Abibov, V. A. Bunakov, V. N. Kopeikin, and R. M. Kondratenko 147 162

Deformation of a Glass-Reinforced Plastic Cylindrical Shell Encased in a Thick-Walled Elastic Cylinder – A. D. Gruskov and V. D. Protasov 150 164

Exact Solution of the Problem of Plane Bending of a Layered Ring – A. S. Kravchuk and I. P. Dmitrienko 154 168

Calculation of the Resistance to the Flow of Polymeric Systems Through Short Channels – A. S. Yurchenko, A. Ya. Malkin, and N. V. Tyabin 157 171

Method and Apparatus for Determining the Shear Modulus and Mechanical Loss Factor of Polymeric Specimens in Uniaxial Tension – V. N. Manin, V. A. Bykov, and T. Dzhaborov 160 174

ABSTRACTS OF ARTICLES DEPOSITED AT VINITI

Relation between the Molecular Structure and the Critical Molecular Weight for the Viscosity of Polymer Melts – V. P. Privalko and Yu. S. Lipatov 163 177

Structure and Properties of Polyamide Coatings – L. L. Mironovich, O. R. Yurkevich, and V. P. Losev 163 177

Investigation of Structure Formation in Thin-Film Polypropylene – R. I. Mamedov and G. D. Aliev 164 177

Some Physicomechanical Properties and Photoaging of Polycarbonate – A. S. Barkov, I. I. Khukhreva, M. A. Berkhotin, S. V. Derevyagina, A. M. Afanas'ev, V. V. Kuz'min, and L. I. Porotikova 164 178

Relation between High-Temperature α'' Relaxation in Polyformaldehyde Fibers and the Supermolecular Structure – A. Z. Golik, Yu. F. Zabashta, M. A. Genina, V. S. Tverdokhleb, and K. A. Zubovich 165 178

Supermolecular Structure Formation in Extruded Low-Pressure Polyethylene Film – K. A. Gasparyan, I. V. Bereznyak, V. G. Baranov, R. G. Mirzoev, and S. Ya. Frenkel' 165 178

Some Properties of Acid-Cure Resites – V. S. Nechaev, L. M. Starkova, and I. G. Shchurova 166 179

Investigation of the Relation between the Structure and Dynamic Properties of Polymers – S. K. Abramov, Yu. V. Efremushkin, B. S. Khodyrev, and Yu. V. Zelenev 166 179

Determination of the Moduli of Elasticity of the Adhesive Layer in Metal Bonding – V. Ya. Ivolgin and V. A. Sidorov 166 179

Some Problems of Strength Connected with the Tensile Failure of Glass Fabric-Reinforced Plastics – I. M. Chernin 167 180

Some Problems of the Strength of Glued and Welded Joints – V. P. Burmistrov and Yu. B. Kargin 167 180

	Engl.	Russ.
Stability of a Glass-Reinforced Plastic Cylindrical Shell in Axial Compression – Yu. N. Berdnikov	168	180
Investigation of the Rheological Properties of Impact Polystyrenes – E. L. Vinogradov, Yu. V. Nikitin, B. I. Shapiro, and T. G. Shlyakhova	168	181
Temperature Stresses in Radio Circuit Microelements – A. A. Pozdnyakov, A. M. Poimanov, and V. A. Sobolev	169	181
Improved Technique for Etching Polymers – A. S. Naumenko	169	181

All-Union Conference on the Micromechanics of Polymer Fracture – V. R. Regel' and A. I. Slutsker	173	185

Volume 9, Number 2 March-April, 1973

	Engl.	Russ.
Ultrasonic Determination of the Stiffness Characteristics of an Orthotropic Material with Imperfect Elasticity – I. A. Zudov and I. M. Zudova	175	195
Viscoelastic Characteristics of the Interaction between Structures and Soils – T. Rashidov and G. Kh. Kozhmetov	184	207
Nonlinear Creep of a Glass Fabric-Reinforced Plastic in Several Complex States of Stress – A. F. Kregers, R. D. Maksimov, and R. P. Turtsin'sh	188	212
Prediction of the Creep of Polyester Resin in the Presence of Randomly Acting Temperature and Humidity Factors. 1. Stationary Random Processes – G. A. Andrikson and Z. V. Kalnrose	194	219
Lifetime Analysis with Allowance for Bond Stress Distribution – V. P. Tamuzh and P. V. Tikhomirov	200	227
Origin of Laser Damage in Transparent Dielectrics of the Plexiglas Type – N. P. Novikov	204	232
Effect of γ Radiation on the Long-Term Strength of Polyethylene Terephthalate – S. N. Karimov, B. N. Narzullayev, G. D. Korodenko, and A. Dzhaloliddinov	209	239
Stresses in Plastics Reinforced with Anisotropic Fibers and Subjected to Transverse Normal Loading – A. M. Skudra and É. Z. Plume	213	244
The Role of the Porous Structure of the Filler in the Reinforcement of Polymers – L. A. Irgen, E. A. Chirkova, and Yu. A. Él'tekov	220	253
Study of the Thermophysical and Antifriction Properties of Polyethylene-Based Compositions. 2. Effect of Fillers on the Thermal Conductivity of Polyethylene – N. G. Andreeva	225	259
Effect of Transverse Shear on the Stability of an Orthotropic Cylindrical Shell with an Elastic Core in Axial Compression – V. L. Narusberg and R. B. Rikards	232	267
Nonlinear Dynamical Problem of a Cylinder with a Slowly Changing Internal Boundary – U. Tokhtarov, M. A. Koltunov, V. I. Morgunov, and I. E. Troyanovskii	237	274
Equilibrium Conditions for Multilayered Anisotropic Viscoelastic Plates in a Complex State of Stress – M. A. Koltunov and M. Z. Kanovich	243	281
Stability of Axially Compressed Cylindrical Composite Shells in the Presence of Nonstationary Heating – L. G. Belozerov and V. A. Kireev	250	289
Application of the Technical Theory to Sandwich Shells with a Solid Polymeric Core – S. M. Shinkareva	257	298
On the Theory of the Flexural Vibrations of a Rotating Viscoelastic Cantilever – G. A. Wang Fo Fy and I. G. Pavlov	262	305

Engl./Russ.

Dynamic Stability of an Elastic Orthotropic Cylindrical Shell with Allowance for Transverse Shears – A. E. Bogdanovich 268 312
Normal Stresses during Periodic Shear Deformation – L. A. Faitel'son and A. I. Alekseenko 275 321
Some Isothermal and Nonisothermal Problems in the Motion of Solutions of Polymers – A. Kh. Mirzadzhanzade and P. M. Ogibalov 281 329
A Method for Determining the Dynamic Young's Modulus of Curvilinear Specimens – S. S. Abramchuk, V. S. Shirokolava, and V. L. Polyakov 286 335

BRIEF COMMUNICATIONS

Distribution Function of the Spherulite Dimensions and the Microhardness of Polypropylene – A. M. Ar'ev, S. M. Olesnevich, and V. D. Kozhurova 291 340
Increasing the Optical Anisotropy of Polyethylene Spherulites – L. S. Koretskaya, V. F. Stepanov, T. I. Tkachenko, and É. G. Il'ina 295 343
Influence of Elevated Hydrostatic Pressure on the Diffusion Constants of Polymer Materials – M. A. Mirkin and V. M. Chebanov 298 344
Kinetics and Consequences of "Bleeding" of Volatiles from Plexiglas – V. I. Prosvirin and E. P. Panteleev 301 346
Vulcanization of Mixtures of Cured and Raw Rubbers in a Shock Wave – V. A. Vasil'ev and P. P. Trofimenko 304 348
Nonsteady Deformation of SKN-18 Rubber – G. M. Bartenev, Zh. S. Suzdal'nitskaya, and N. V. Ermilova 306 350
Influence of Fillers on the Poisson Ratios of Rubber-Like Polymers – L. M. Élektrova, P. V. Melent'ev, and Yu. V. Zelenev 308 351
Bulk Deformation during Linear Extension of Certain Solid Polymers – N. I. Naimark, A. G. Zatsepin, and I. V. Shamov 310 352
Effect of Plasticization on the Activation Energy of Failure of Nitrocellulose – V. A. Mal'chevskii, V. R. Regel', V. I. Zheleznov, and M. G. Fal'kovskii 313 355
Influence of Vibration on Creep in Glass-Fiber-Reinforced Plastic in a Complex State of Stress – R. P. Turtsin'sh 317 358
Influence of the Solvent on the Durability of Cellulose Acetate Films Formed from Solutions – M. K. Kurbanaliev, A. A. Tager, B. N. Narzullaev, N. S. Rasulov, I. K. Dustov, V. E. Dreval', and A. A. Anikeeva 320 360
Intensity of Mechanical Action and Mechanical Degradation of Rigid Polymers – L. M. Polukhina and N. K. Baramboim 323 362
Increasing the Adhesion of Polymers to Metals by Adding Substances with Conjugation Systems – A. A. Berlin, V. E. Basin, M. I. Cherkashin, M. G. Chaucer, and V. A. Grigorovskaya 326 365
Processing Polyethylene Film in the Corona Discharge – M. Ya. Romankevich and I. P. Girko 329 367
Displacement of a Compressed Packing Ring of Oval Cross Section – M. A. Maiskaya 330 368
Dynamic Modulus of Polymethylmethacrylate Saturated with Carbon Dioxide – G. B. Okonishnikov, E. I. Blednykh, and V. P. Skripov 333 370
A Method of Making Specimens of Free Varnish Films for Physicomechanical Testing – R. G. Osnach 336 372

ABSTRACTS OF ARTICLES DEPOSITED AT VINITI

Induced Anisotropy in Liquids with a Microstructure: The Effect of Normal Stresses – V. M. Suyazov 337 374
Relaxation Processes in the System Epoxy Resin – Plasticizer – Yu. S. Lipatov, F. G. Fabulyak, and G. P. Ovchinnikova 337 374
A Correlation Theory of Structurally Inhomogeneous Polymer Networks – V. É. Zgaevskii 338 374
Thermorelaxation Characteristic and Fatigue Life of Cast Polymer Compounds – K. N. Kan, A. F. Nikolaevich, and É. A. Miilen 338 375

	Engl.	Russ.
Creep in Optically Active Epoxy-Thiokol Compound – V. M Mal'tsev, A. V. Shvetsov, and A. A. Zamesov	338	375
Mechanical α-Relaxation in "Ariloks" (Polyphenylene Oxide) – V. O. Shestopal, I. S. Filatov, and B. I. Yudkin	339	375
Mechanical Relaxation of Epoxy Polymers in the Presence of a Filler – R. M. Sultanaev, V. G. Khozin, and V. A. Voskresenskii	339	376
Influence of Notches on the Long-Term Strength of Polyethylene – D. F. Kagan and R. F. Lokshin	339	376
Orientation of Cracks Caused in "Transparent" Polymers by Laser Radiation – A. A. Orlov and P. I. Ulyakov	340	376
Fracture of Phenolic Glass-Fiber-Reinforced Plastics under the Influence of Temperature and an Aggressive Medium – V. G. Makarov, M. G. Yartsev, T. K. Kosachenko	340	377
Influence of Structural Parameters on the Shrinkage of Chaotically Reinforced Glass-Fiber-Reinforced Plastics – A. V. Motavkin and A. M. Krivatkin	341	377
Stress Analysis of a Cylindrical Glued Joint with Arbitrary Parameters – L. P. Terekhova and I. A. Skoryi	341	378
Stability of the Plane Form of Flexure for a Strip of Nonlinearly Elastic Material – V. M. Kobrinets	342	378
Stability of a Supported Cylindrical Lining Made of a Material with Different Moduli under Compression and Tension – O. I. Terebushko	342	379
On the Hydrodynamic Theory of the Wall and Axial Effects and the Fahraeus–Lindquist Effect – V. M. Suyazov	343	379
ANNIVERSARY		
Seventieth Birthday of Anatolii Petrovich Aleksandrov	344	380

Volume 9, Number 3 May-June, 1973

	Engl.	Russ.
Limiting Stretch Ratios of Polymers. Role of Molecular Mobility – V. V. Zhizhenkov, E. A. Egorov, and T. M. Petrukhina	345	387
Variant of Statistical Interpretation of the Formation of Viscoelastic Deformations of Polymers – Yu. S. Urzhumtsev	349	392
Acoustic Creep of Glass-Fiber-Reinforced Plastic. Communication 1 – Ch. L. Daugste and Yu. S. Urzhumtsev	353	397
Transition Functions of the Il'yushin Approximation Method – A. A. Koltunov and M. A. Koltunov	360	405
Numerical Methods in the Theory of Viscoelasticity – B. E. Pobedrya	371	417
Method of Solving Equations of Motion of Viscoelastic Media – I. G. Filippov	382	429
Numerical Model of One Possibility of Determining the Tensor of Elastic Constants of an Anisotropic Body – I. I. Grakh and Ya. S. Sidorin	389	436
Deformative Properties of Flexible Plastic Foams in Compression – A. G. Dement'ev and O. G. Tarakanov	395	443
Elastic Modulus of a Nonpolar Polymer – V. A. Kuznetsov	401	450
Predicting Rupture Processes in Glass Plastics by a Seismoacoustic Method. 2. Characteristics of the Accumulation of Damage in Woven Glass Plastics during Uniaxial Elongation – M. Ya. Tutan, A. G. Adamovich, and K. Ya. Zakolovskii	405	455
Failure of Oriented Materials under Tension – V. P. Tamuzh and P. V. Tikhomirov	409	460
Correlation between Static and Fatigue Strength of Reinforced Plastics – P. P. Oldyrev	416	468
Autovibrational Development of Laser Cracks – O. E. Marin, N. F. Pilipetskii, and V. A. Upadyshev	422	475

Eng./Russ.

Tensile Strength of Unidirectionally Reinforced Plates Stretched at an Angle to the Direction of Reinforcement – A. M. Skudra and É. Z. Plume 428 482
Relationship of Some Mechanical and Thermophysical Properties of Polymer Compositions to Reduced Filler Concentration – G. K. Kuznetsov and L. A. Irgen 433 487
Shear Strength of Composites Based on Whiskerized Fibers – G. M. Gunyaev, I. G. Zhigun, T. G. Sorina, and V. A. Yakushin 437 492
Singular Approximation for the Calculation of the Elastic Properties of Reinforced Systems – A. G. Fokin 445 502
Technological Anisotropy of Chaotically Reinforced Glass-Fiber-Resin Materials – A. V. Motavkin, V. N. Martynov, and V. A. Teleshov 450 507
The Probability of Rupture in Adhesion – J. J. Bikerman 457 516
Effect of the Surface Activity of Polymers during Degradation on the Friction and Wear of Plastic–Metal and Metal–Metal Pairs – Yu. A. Evdokimov, S. S. Sanches, and N. A. Sukhorukov 460 520
Effect of the Deformation of the Film–Substrate System on the Physicochemical Properties of Films and Their Adhesion Strength – V. E. Basin, G. I. Artemova, and T. N. Andreeva 467 526
Nonlinear Parametric Vibrations of Cylindrical Shells Made from Composite Materials – A. S. Vol'mir and A. T. Ponomarev 471 531
Stability of Linearly Viscoelastic Bars Made from Polymer Materials of Variable Cross Section – G. I. Mandichev, V. B. Popov, and L. Ts. Salchev 478 540

BRIEF COMMUNICATIONS

Some Specific Features of the Development of Destructive Fissures in Polymers – N. P. Novikov 483 547
Effect of Stabilizing Additives on the Strength Characteristics of Rigid Polyvinyl Chloride – G. S. Baronin, E. V. Minkin, and K. S. Kazaryan 486 550
Effect of Gaseous Oxygen Pressure on the Kinetics of Accumulation of Residual Deformation in Resins – G. M. Bartenev, V. G. Rebizova, A. S. Kosenkova, V. S. Kardash, and E. P. Stogova 489 552
Method of Solving Nonlinear Dynamic Problems in Viscoelasticity – F. Badalov and T. Kholmatov 492 554
On the Solution of Physically Nonlinear Quasistatic Problems in Viscoelasticity – F. Badalov and R. Batirov 496 558
The Effect of Stabilizers on the Fatigue Strength of Polycaproamide under Tension–Compression – I. P. Bareishis and A. V. Stinskas 499 562
Method of Constructing Shock Compression Diagrams for Foam Plastics – B. A. Tarasov 504 566
Failure of Elastomers under External Stress Concentrators – Yu. S. Zuev and A. P. Komolikova 502 564
Procedure for Measuring the Thermophysical Properties of Polymers at High Hydrostatic Pressures – B. A. Arutyunov, M. V. Belostotskii, and R. D. Stepanov 506 568

Effect of Rate of Application of the Load on the Adhesion of Coatings – N. A. Nechiporenko and S. A. Moseeva	679	763
Longitudinal-Transverse Bending of Three-Layer Bars by Short Pulses – E. G. Goloskokov, V. V. Ermakov, and V. P. Ol'shanskii	680	763
Investigation of the Elastic Properties and Expansion Coefficient of Rigid Polymers during Cure – O. E. Ol'khovik and A. Ya. Gol'dman	680	763
On the Calendering of Polymers – V. F. Yakovenko and V. E. Rybak	681	764

Volume 9, Number 5 September-October, 1973

Mechanics of the Static Tension of a Through Chain in Amorphous Crystalline Polymers – V. A. Kosobukin and A. D. Chevychelov	683	771
Description of Creep of Composition Materials under Tension and Compression – Yu. N. Rabotnov, L. Kh. Papernik, and E. I. Stepanychev	690	779
Forward and Reverse Creep of a Physically Nonlinear Polymer Material – A. F. Kregers, U. K. Vilks, and M. Ya. Leitane	696	786
Nonlinear Creep in High-Density Polyethylene under Time-Different Stresses – A. F. Kregers, U. K. Vilks and M. Ya. Leitane	704	796
Study of Mechanical Relaxation Processes in Ladder Organosilicon Polymers – Yu. P. Kvachev, I. I. Perepechko, V. S. Papkov, V. Yu. Levin, A. A. Zhdanov, G. L. Slonimskii, and K. A. Andrianov	710	804
Some Relationships between the Specific Functions and Constants of Viscoelastic Media – A. A. Koltunov	715	810
Polycaprolactam Hardening during Cyclic Loading – I. P. Bareishis and A. V. Stinskas	719	815
Experimental Study of Polyethylene under Simple Loading – I. A. Gromova and A. N. Nikitochkin	723	820

Eng./Russ.

Use of Green's Functions of the Laplace Equation in the Solution of Problems of Thermoelasticity of Anisotropic Bodies – S. D. Volkov, V. N. Girs, Yu. V. Denisov, N. A. Klinskikh, and M. L. Komissarova 726 823
Reversibility of the Orientation Effect in Linear Polymers – V. I. Prosvirin and E. P. Panteleev 733 830
Use of the Time-of-Flight Mass Spectrometer to Study the Volatile Products from Mechanical Degradation of Polymers in a Vibration Grinder – B. Ya. Byl'skii, O. F. Pozdnyakov, V. R. Regel', and B. P. Redkov 737 835
Strength of Boroaluminum – a Composite Containing Brittle Fiber – S. T. Mileiko, N. M. Sorokin, and A. M. Tsirlin 741 840
Form of Strength Criterion in Isotropic Materials – B. S. Bobrov 749 847
Composite Materials Reinforced with a System of Three Straight, Mutually Orthogonal Fibers. I. Calculation of the Elastic Characteristics – Yu. M. Tarnopol'skii, V. A. Polyakov, and I. G. Zhigun 754 853
Efficiency of Capron Single Fibers in a Friction Unit. I. – A. V. Ermolina, N. S. Yartseva, S. M. Perlin, B. S. Petrovskii, L. A. Polovikhina, and M. P. Zverev 760 861
Dual Problem of Optimizing an Orthogropic Cylindrical Shell – R. B. Rikards 765 865
Equations of Thermoelasticity for Glass-Plastic Shells – O. N. Ivanov 770 872
Stress Distribution in the Vicinity of a Circular Hole in an Orthotropic Spherical Shell with Finite Shear Rigidity – A. A. Syas'kii and E. I. Lun' 776 879
Possible Mechanism of Creep under Internal Pressure in Laminated Rings Made of Composite Material – A. I. Beil' and G. G. Portnov 780 884
Geometrically Nonlinear Equations of Motion of an Elastic Sandwich Shell – M. S. Gershtein 785 891
Investigation of Nonlinear Properties of Composites Consisting of Linear-Elastic Components – M. M. Soldatov 791 898
Statistical Analysis of Some Characteristics of Cylindrical Glass-Fiber-Reinforced Plastic Materials – A. M. Sinyukov, B. I. Bel'chich, V. V. Kostylev, and V. A. Onoprienko 797 906
Degree of Deformation and Strength of Compact Bone Tissue during Torsion – I. V. Knet-s, G. O. Pfafrod, Yu. Zh. Saulgozis, Ya. B. Laizan, and Kh. A. Yanson 801 911

BRIEF COMMUNICATIONS

Impact Strength of High-Density Polyethylene with Various Molecular Weight Distributions – A. N. Karasev, I. N. Andreeva, M. G. Karaseva, and and N. M. Domareva 807 919
Profile of a Laser Crack in Polymethyl Methacrylate – I. L. Vuntsevich, O. E. Marin, N. F. Pilipetskii, and V. A. Upadyshev 810 921
Self-Oscillatory Character of the Growth of Laser Cracks – N. P. Novikov 813 923
On the Number of Relaxation Regions in Polyformaldehyde – A. Z. Golik, Yu. F. Zabashta, A. Ya. Fridman, and S. S. Pelishenko 815 925
Forced Oscillations of a Viscoelastic System with a Finite Number of Degrees of Freedom – I. E. Troyanovskii 818 927
Effect of Fillers on the Sensitivity of Epoxide Compositions to Stress Concentrations in the Glassy State – V. M. Startsev and A. T. Sanzharovskii 820 929
Study of the Strength and Coefficients of Friction of Metal-Containing Polymers Based on Heteropolyacids – M. L. Barabash, Yu. N. Kopichev, V. V. Kuz'movich, N. A. Ivkina, and A. F. Shevtsova 823 931
Polymeric Pairs Having a Low Coefficient of Friction – S. B. Ainbinder and L. M. Liberman 825 933
An Asymptotic Calculation of the Vibrations of a Viscoelastic Cylinder with a Slowly Varying Internal Boundary – B. I. Morgunov 828 935
Nonlinear Vibrations of a Viscoelastic Beam – T. Kadyrbekov 832 939
An Experimental Study of the Deformation of Multilayer Cylindrical Shells – M. V. Nikulin and V. P. Korolev 836 943

	Engl.	Russ.
An Optimal Compressed Circular Cylindrical Shell – R. B. Rikards	838	944
Laminar Motion of Aqueous Polymer Solutions – R. S. Gurbanov, N. A. Gasan-zade, and Kh. A. Tagi-zade	841	947
Quantitative Evaluation of the Brittleness of Carbon Fibers – L. E. Utevskii, A. V. Savitskii, A. P. Stepanova, R. M. Levit, V. G. Raikin, and L. A. Frumkina	844	950
Machine with Inertial Excitation of Dynamic Loads for Testing Rigid Polymers for Fatigue Bending – E. P. Panteleev and V. I. Prosvirin	847	952
ABSTRACTS OF ARTICLES DEPOSITED AT VINITI		
Character of Relaxational Processes in Polymer Compositions – A. B. Aivazov and Yu. V. Zelenev	851	956
Distribution of Distances between Filler Particles in Polymers – S. G. Zhirov	851	956
Investigation of the Dispersion of Elastic Waves in Fibrous Diperiodic Media – A. M. Shvidanenko	851	956
Physicomechanical Properties of Nonwoven Materials Prepared with the Aid of Aqueous Polyurethane Dispersions – S. V. Beshevli and N. V. Mikhailov	852	957
Actual Contact Area of Glued Nonwoven Materials with a Hard, Smooth Surface – M. I. Grushin, N. A. Konstantinova, and V. B. Tikhomirov	852	957

Volume 9, Number 6 November-December, 1973

	Engl.	Russ.
Rheological Characteristics of Melts of Low-Molecular-Weight Branched Polyethylene in the Region of Critical Molecular Weights – É. É. Yakobson, L. A. Faitel'son, L. L. Sul'zhenko, V. P. Kovtun, N. M. Domareva, I. P. Briedis, and V. V. Aref'eva	855	963
Mechanism of the Increase in Strength and Heat Resistance of Oriented Polymeric Materials Modified by Graft Copolymerization with Vinyl Monomers – A. I. Kurilenko	860	968
Propagation of Elastic Waves along the Fibers in Oriented Glass-Reinforced Plastics – S. D. Davydov, G. G. Zaretskii-Feoktistov, and V. V. Sudakov	867	976
Analysis of Fracture Surfaces in Polymethyl Methacrylate Tested in Bending with Rotation – P. P. Oldyrev and V. M. Parfeev	873	984
Experimental Investigation of the Strength of Anisotropic Materials in Biaxial and Triaxial Compression – E. K. Ashkenazi, A. V. Lavrov, O. S. Myl'nikova, and V. D. Popov	879	991
Dependence of the Threshold Laser Pulses for Polymethyl Methacrylate on Specimen Temperature and Stress – M. B. Agranat, N. P. Novikov, V. P. Perminov, and P. A. Yampol'skii	885	997
Thermodynamic Determination of the Shift Factor. 1. Temperature Shift Factor – Yu. M. Molchanov and G. A. Andrikson	888	1001
Composites Reinforced with a System of Three Straight Mutually Orthogonal Fibers. 2. Experimental Study – I. G. Zhigun, M. I. Dushin, V. A. Polyakov, and V. A. Yakushin	895	1011
Questions Relating to the Design of Multilayer Glass-Reinforced-Plastic Systems in Compression – M. Z. Kanovich and A. L. Rabinovich	901	1019
Investigation of the Effect of Polymer Coatings on Wear under Vibrational Loads – S. B. Ainbinder, O. S. Zheglov, and L. M. Liberman	909	1029
Effect of a Vacuum on the Adhesion of Rubbers to Metal – I. P. Glukhareva, S. I. Kharkhardin, and V. G. Raevskii	914	1036
Effect of Certain Structural and Technological Parameters on the Tensile Strength and Deformation of Unidirectionally Reinforced Plastics – M. Z. Medvedev	919	1042
Concerning the Critical Load for an Orthotropic Cylindrical Shell with a Viscoelastic Core – V. L. Narusberg, R. B. Rikards, and G. A. Teters	924	1049

Engl./Russ.

Action of a Concentrated Load on an Elastic Ring Pressed into a Circular Hole in an Anisotropic Plate – T. L. Martynovich and V. S. Shchukin 928 1054
Investigation of the Performance of Composite Shells under Repeat Internal Pressure – L. V. Antypko and T. D Karimbaev 933 1060
Analysis of the Effect of Transverse Shear Strains on the Stability of Multilayer Cylindrical Shells under External Pressure – A. E. Ryzhkin 938 1066
State of Stress of Flexible Plastic Shells with an Opening – Ya. F. Kayuk and M. K. Alekseeva 942 1071
Some Features of the Unwinding of Glass-Reinforced Plastic Rings – A. P. Velichko and V. I. Azernikov 946 1076
Behavior in the Transient Regime of Vibrating Systems Incorporating Nonlinear Spring–Plastic Shock Absorbers – G. L. Kedrova 951 1082
Lateral Strain Coefficients of Human Compact Bone Tissue – Yu. Zh. Saulgozis, I. V. Knets, and Kh. A. Yanson 957 1089
Hardness of the Human Tibia – Kh. A. Yanson, G. R. Bite, I. V. Knets, and Yu. Zh. Saulgozis 966 1101
Apparatus for Investigating Glass-Laminate Fatigue Strength and Damage Accumulation in Cantilever Bending – Yu. I. Kizima, K. G. Kirilov, and S. L. Skalozub 972 1108

BRIEF COMMUNICATIONS

Investigation of the Vibration of Viscoelastic Pipes in a Viscoelastic Soil – G. Kh. Khozhmetov and T. Mavlyanov 976 1112
Evaluation of Integral Operators of Viscoelasticity – I. E. Troyanovskii 979 1115
Statistical Estimate of a Static Strength Criterion for AG-4s Two-Way Glass-Reinforced Plastic – V. A. Pashkov 982 1117
Temperature Dependence of the Coefficient of Friction of Ftorlon–Graphite Fiber – G. A. Sirenko and V. P. Sviderskii 985 1120
Optimal Rigidity of a Thin-Walled Orthotropic Cylinder in Combined Tension and Torsion – G. P. Zaitsev and L. S. Makhov 986 1121
Optimization of the Axial Stability of Equal-Strength Reinforced Cylindrical Pressure Vessels – A. B. Mitkevich and V. D. Protasov 988 1123
Stability of Hinged Viscoelastic Rods under Dynamic Loading – P. Kurbanov 991 1126
Rheological Characteristics of a Low-Molecular-Weight Branched Polyethylene Melt near the Melting Point – I. P. Briedis, L. L. Sul'zhenko, L. A. Faitel'son, and É. É. Yakobson 994 1129
Testing Glass-Reinforced Plastic Rings by Means of Rigid Sectors – V. P. Nikolaev 997 1132

BOOK REVIEWS

V. A. Belyi, A. I. Sviridenok, M.I. Petrokovets, and V. G. Savkin, Polymer Friction – Reviewed by S. B. Ainbinder 1000 1135
